Enterprise Security and Compliance Manual - Part 1

Section 1: Access Control and Identification

All personnel must wear identification badges at all times within secure facilities.

Access to database clusters requires explicit authorization from security leads.

Multi-factor authentication is enforced across all engineering staging clusters.

Enterprise Security and Compliance Manual - Part 2

Section 2: Incident Response Protocol

Security incidents must be reported to soc@enterprisedoc.ai within 15 minutes.

The incident response team initiates triage and isolation procedures immediately.

Post-incident root cause analyses must be submitted within 72 hours of resolution.

Enterprise Security and Compliance Manual - Part 3

Section 3: Compliance Standards and Data Retention

The organization undergoes annual SOC 2 Type II and ISO 27001 third-party audits.

Customer activity telemetry and audit trails must be retained for 7 calendar years.

Deletion of production log streams before the retention period is strictly prohibited.

Enterprise Security and Compliance Manual - Part 4

Section 4: Disaster Recovery and Business Continuity

Database snapshots are replicated asynchronously across multi-region availability zones.

The Recovery Time Objective RTO is strictly 60 minutes for tier-one applications.

The Recovery Point Objective RPO is guaranteed under 5 minutes of transaction data.
